Subject: East Texas Ag Services Fire - Final Update
Date: Friday, May 30, 2014 3:58:24 PM

Containment barriers were established, for collection of minimal firefighting water (misting), early this morning as equipment was brought in to pull down walls and drag out product to speed up final smoldering. Fire investigators are now assessing the site for potential causes of the fire. Fire suppression activities were completed at approximately 11:00am CDT. Only low level ammonia readings were being indicated by monitoring equipment, with no significant air quality concerns remaining. EPA OSC Hayes demobilized at 11:30am. EPA START switched shifts at 11:30am, and will continue to spot check air quality surrounding the site throughout the day. Unless additional developments arise, this is a final update.
